ABSTRACT

This study was to examine the effect of product quality, product diversity and brand image on buying interest in Eiger outdoor equipment in the city of Bukittinggi. This study was conducted on 80 respondents of consumers who are interested in buying Eiger outdoor equipment in the city of Bukittinggi taken by purposive sampling technique. The data analysis method used is multiple linear regression. Hypothesis testing using the T-statistic test to prove the effect of independent variables on the dependent variable partially or individually

The results of this study found that the diversity of products and brand image partially had a positive and significant effect on the interest in buying Eiger outdoor equipment in Bukittinggi, for product quality variables did not affect the buying interest in Eiger outdoor equipment in Bukittinggi.
