

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

In this chapter, the researcher described conclusions and suggestions. The conclusions and suggestions were drawn based on the result of data analysis.

5. 1 CONCLUSIONS

Based on the result of the data analysis, the researcher concluded that :

1. In general, the students' speaking ability after andemic at FKIP of Bung Hatta University was very high. It was proved by fact from 30 students that 9 students (30%) had very high ability, 9 students (30%) had high ability, 6 students (20%) had moderate ability, and 6 students (20%) had low ability. The classification of students score based on criterion reference of Bung Hatta University are (80% – 100%) had very high score, (65% - 79,99%) had high score, (55% - 64,99%) had moderate score, and (0% - 54,99%) had low score.
2. The students' speaking ability after pandemic at FKIP of Bung Hatta University seen from Content was moderate. It was proved by fact from 30 students that 7 (23,3%) had very high ability, 2 students (6,66%) had high ability, 13 students (43,3%) had moderate ability, and 8 students (26,6) had low ability. The classification of students score based on criterion reference of Bung Hatta University are (80% – 100%) had very high score, (65% - 79,99%) had high score, (55% - 64,99%) had moderate score, and (0% - 54,99%) had low score.
3. The students' speaking ability after pandemic at FKIP of Bung Hatta

University seen from Vocabulary was very high. It was proved by fact from 30 students that 10 students (33,3%) had very high ability, 9 students (30%) had high ability, 4 students (13,3%) had moderate ability, and 7 students (23,3%) had low ability. The classification of students score based on criterion reference of Bung Hatta University are (80% – 100%) had very high score, (65% - 79,99%) had high score, (55% - 64,99%) had moderate score, and (0% - 54,99%) had low score.

4. The students' speaking ability after pandemic at FKIP of Bung Hatta University seen from Grammar was low. It was proved by fact from 30 students that 9 students (30%) had very high ability, 1 students (3,33%) had high ability, 5 students (16,6%) had moderate ability, and 15 students (50%) had low ability. The classification of students score based on criterion reference of Bung Hatta University are (80% – 100%) had very high score, (65% - 79,99%) had high score, (55% - 64,99%) had moderate score, and (0% - 54,99%) had low score.

5. 2 SUGGESTIONS

Based on the conclusions above, the researcher gives some suggestions as follows:

1. The students are suggested to always practice themselves because it can help to improve ability to speak English well
2. Because the researcher only examined the students' speaking ability after pandemic, especially seen from content, vocabulary, pronunciation, grammar, and fluency and always practice themselves to improve to

speaking English well

3. To the future researcher, the researcher suggested to use another topic that will be researched.
