BAB V

CONCLUSIONS AND SUGGESTIONS

This chapter covered the research's conclusions and suggestions. The research question analysis's results provide the basis of the conclusion. The suggestion is propose to provide information for a subsequent researcher who wants to carry out research in the same field.

5.1 Conclusions

Based on chapter IV which contains findings and discussion, the characters in Coco movie used some metaphors in their conversation. In the study done by the researcher, the researcher used theory that was proposed by Ullman (1972). The methapor found in Coco movie series are anthropomorpic metaphor, animal metaphor, from concrete to abstract metaphor, and synesthetic metaphor.

In this research the researcher found 35 data. Anthropomorphic metaphor has 2 data, Animal metaphor with 2 data, 22 data from concrete to abstract metaphors which are most frequently used, and the last is 9 data of synesthetic metaphor. Following the author's analysis of the many types of metaphor, the meaning of the metaphor was examined by considering the context.

5.2.1 Suggestions

In this study, the researcher made two statements about metaphor: its types and its meaning. Here are a few pieces of advice for upcoming researchers who have same interest in this field of study:

1. There are a lot of movies that could be the object of study. The following researcher might choose to employ a different movie genre, such as crime, scientific, musical film, documenter, and others. However, it would be preferable if the following researcher employed a different object, such as a poetry, newspaper, or advertisement.

2. The following researcher might examine metaphor in both verbal and visual terms.

3. The following researcher might use a different theory to analyze the metaphors that will be examined in the study. As a result, the following researcher will be able to comprehend metaphor deeper.
