----- REVIEW 1 -----

PAPER: 483

TITLE: Performance Analysis of an Adaptive Neuro Fuzzy Inference Systems (ANFIS) for Speed Control of Brushless DC Motor

AUTHORS: Hidayat Tanjung, Sasongko Pramono, Sarjiya and Eng Suharyanto

Because the research topic is not a new one, and it is rather difficult to know what exactly will be emphasized by the author in their analysis, it is recommended that the authors should

hardly find, explore and represent in their fullpaper an original value although small but difference with other papers in the same topic.
