ACKNOWLEDGEMENT

Alhamdulillahirabbil'alamin. First of all, the researcher would like to express her deepest gratitude to the Almighty God – Allah SWT, for giving blessing, strength, health, inspiration, opportunity, and patience to finish writing this thesis, and she also would like to send Sholawat and Salam to Prophet Muhammad SAW. Finally, the researcher could finish her thesis, entitled “**An Analysis of the Tenth Grade Students’ Ability in Writing Descriptive Texts Using a Picture on Instagram at MAN Kota Solok**”. The primary aim of this thesis is to fulfill a partial requirement for getting strata one (S1) degree from the English Department, the Faculty of Teacher Training and Education, Bung Hatta University.

There are a lot of people who have helped and given motivation, advice, and support to the researcher in writing this thesis. Therefore, the researcher would like to express her gratitude to her advisor: Dr. Lely Refnita, M.Pd. who had given her guidance, time, input, and expertise so that the researcher could finish writing this thesis. The researcher would also thank her beloved parents, Giri Susanto and Syarifah Misfalah for their full support, motivation, and prayer for the researcher in writing this thesis. She would also thank her sister, Risya Farisi for giving support and caring. She would also thank her best friend Swag Squad and her classmate for giving support.

Next, the researcher would like to present her sincere appreciation to Dr. Yetty Morelent, M. Hum as the Dean of the Faculty of Teacher Training and Education, Dra. Zulfa Amrina, M. Pd as the Vice Dean, Fitriana Harmaini, S.S., M.A. as the Head of English Department, and all lecturers who taught and guided the researcher during studying at the English Department of Bung Hatta University. The researcher would also thank her second scorer named Silva Saputri, who helped the researcher to calculate the raw score data and gave support to the researcher to finish writing this thesis.

Finally, the researcher hopes that this research can be useful and can add insight to the readers. The researcher realizes that this thesis is not perfect yet, so the researcher welcomes suggestions and criticism from the readers.

Padang, 2023

The Researcher

ABSTRACT

Amanda, A. A. 2023. *An Analysis of the Tenth Grade Students' Ability in Writing Descriptive Texts Using a Picture on Instagram at Man Kota Solok*

Advisor: Dr. Lely Refnita, M.Pd.

The purpose of this study is to describe the ability of tenth grade students in writing descriptive text using pictures on Instagram at MAN Kota Solok in the academic year 2022/2023. The researcher used a descriptive method for this study. The sample of this study were tenth grade students of X MIPA 1 and X MIPA 2 at MAN Kota Solok. The researcher used a purposive sampling technique to select samples, and the number of samples was 63 students. The instrument to collect data in this study was a writing test on Instagram. In order for the test to be reliable, the researcher used the inter-rater method. The results to have got test, the test analysis showed that the test was reliable. This is supported by the fact that the correlation coefficient is 0.986. This is greater than the r table value at df 60 and alpha 0.05 (0.250). Then the test was valid in terms of content as it covered all the material that the students had learned.

In general, the students had high proficiency in writing descriptive texts (develop to content, to organize, using vocabulary, using grammar, and using mechanics). This is supported by the fact that 38 students (60.32%) had a high ability in writing descriptive text. In detail, 6 students (9,52%) had high ability and 57 students (90,48%) had low ability to develop the content of descriptive text. 24 students (38,10%) had high ability and 39 students (61,90%) had low ability to organize descriptive text. 43 students (68,26%) had high ability and 20 students (31,74%) had low ability to use grammar in writing a descriptive text. 51 students (80,95%) had high ability and 12 students (19,05%) had low ability to use mechanic in writing a descriptive text. 59 students (93,65%) had high ability and 4 students (6,35%) had low ability to use vocabulary in writing a descriptive text.

By finding out the that students had high ability, the researcher provide suggestions to teachers, students, and future researchers to be able to use Instagram as a medium and can develop other more innovative media.

CHAPTER I

INTRODUCTION

In this chapter, the researcher discusses about the background of the problem, the identification of the problem, the limitation of the problem, the formulation of the problem, research questions, the purposes of the research, and the definition of the key terms.

1.1 The Background of the Problem

English is an international language that is used as the main language in several countries. In Indonesia, even though English is a foreign language, it is one of the subjects that students must learn at school. In English, there are 4 skills that must be mastered: reading, speaking, listening, and writing.

Writing skill is the ability to express ideas in a word that has meaning. According to some students, writing skills are considered the most difficult ability to master compared to other language skills. Writing skills are obtained from the training process. Writing skills cannot be obtained simply by studying grammar and studying knowledge of writing theory, let alone memorizing the definitions of terms contained in the field of writing. Writing is also a skill that requires the writer to master various elements outside of the language itself which will become the content of a piece of writing (Nurgiyantoro, 2001:271).

There are several types of text in learning English such as descriptive text, explanation text, recount text, narrative text, report text, news item text, procedure text, and exposition text. Descriptive text is a text that describes an object such as

animals, locations, and others. Usually, the descriptive text focuses on one object and is described in detail and based on facts, so that readers can imagine the object being described.

Writing descriptive text is one of the tenth grade materials studied in high school and must be mastered by students but this is not an easy thing. Based on the results of observations when teaching practice at MAN Kota Solok, the researcher found that some students experienced difficulties when writing a descriptive text, such as the use of mechanics which were often wrong, the use of incorrect grammar, lack of vocabulary, and difficulty in developing an idea. Nowadays almost every student has an Instagram, so it can be used as a medium to train students' skills in expressing their ideas and thoughts.

Instagram is now one of the most used social media. Kessler (2013:615) states that Instagram is a unique way for teachers and students to connect and share information. Instagram can also be a medium that can be used by teachers to make learning more innovative and interesting so that students are more interested in learning. In this activity, teachers and students can post interesting pictures and write descriptive text with the theme given by the teacher.

Several researchers conducted research on students' ability to write descriptive text on Instagram, such as Hilman in 2019 from Galuh University. The title of the thesis is "*The effectiveness of using Instagram in developing students' descriptive text writing*". The research subject was class X Islamic Senior High School (MA) in Tasikmalaya. The results of this study showed that Instagram can

contribute to writing descriptive text so that it can improve students' abilities in writing descriptive and the results are quite good although there are elements that need to be improved.

Insani in 2020 from Muhammadiyah University of Makassar wrote a thesis entitled "*The use of Instagram to improve students' writing skills in descriptive text*". The research subject was the tenth grade of SMAN 2 Wajo. The result of this study showed that the use of Instagram can improve students' writing skills, especially writing descriptive text at the tenth grade of SMAN 2 Wajo. This is proven by the increase of students' average score from the pre-test to the post-test.

Based on the description above, the researcher was interested in analyzing students' writing skills using Instagram as a supporting medium in the learning process. Therefore, the research conducted by the researcher is entitled "*An analysis of the tenth grade students' ability in writing the descriptive texts using a picture on Instagram at MAN Kota Solok*".
