Abstrak

Penelitian ini bertujuan untuk mendeskripsikan efektivitas pelaksanaan peraturan Menteri Sosial Republik Indonesia nomor 1 tahun 2018 tentang Program Keluarga Harapan di Kelurahan Gunung Sarik Kota Padang. Jenis penelitian ini adalah kuantitatif dengan metode deskriptif. Populasi dalam penelitian ini berjumlah 386 keluarga penerima PKH. Teknik data yang digunakan adalah kuesioner, wawancara, dan dokumentasi. Kuesioner diinterpretasikan dengan menggunakan skala likert. Kriteria efektivitas Program Keluarga Harapan yang digunakan adalah ketepatan sasaran, tujuan program, sosialisasi program dan pemantauan program dengan kriteria program yaitu komponen kesehatan, komponen pendidikan dan komponen kesejahteraan sosial. Hasil penelitian menunjukkan bahwa Program Keluarga Harapan secara keseluruhan pada indikator ketepatan sasaran komponen kesehatan tidak efektif dengan rata-rata 58%, pendidikan sangat efektif dengan rata-rata 95% dan kesejahteraan sosial sangat efektif dengan rata-rata 88%, sosialisasi program pada komponen kesehatan sangat efektif dengan rata-rata 90%, pendidikan sangat efektif dengan rata-rata 90% dan kesejahteraan sosial sangat efektif dengan rata-rata 93%, tujuan program pada komponen kesehatan cukup efektif dengan rata-rata 67%, pendidikan sangat efektif dengan rata-rata 88%, kesejahteraan sosial sangat efektif dengan rata-rata 88% dan pemantauan program pada komponen kesehatan sangat efektif dengan rata-rata 90%, pendidikan sangat efektif dengan rata-rata 90% dan kesejahteraan sosial sangat efektif dengan rata-rata 93%. Berdasarkan hasil penelitian dapat disimpulkan bahwa efektivitas pelaksanaan peraturan Menteri Sosial Republik Indonesia nomor 1 tahun 2018 tentang Program Keluarga Harapan di Kelurahan Gunung Sarik Kota Padang sudah terlaksana dengan sangat efektif.

Abstract

This study aims to describe the authority to implement the Regulation of the Minister of Social Affairs of the Republic of Indonesia number 1 of 2018 concerning the Family Hope Program in Gunung Sarik Village, Padang City. This type of research is quantitative with descriptive methods. The population in this study was probably 386 PKH recipient families. The data techniques used were questionnaires, interviews, and documentation. The questionnaire was interpreted using a Likert scale. The criteria for the authority of the Family Hope Program used are the accuracy of targeting, program objectives, socialization programs, and monitoring programs with program criteria namely the health component, the education component and the social welfare component. The results showed that the Family Hope Program as a whole on the indicators of targeting accuracy of the health component was not effective with an average of 50%, education was very effective with an average of 95% and social welfare was very effective with an average of 88%, the socialization program on the health component Very effective with an average of 90%, education is very effective with an average of 90% and social welfare is very effective with an average of 93%, program objectives in the health component are quite effective with an average of 67%, education is very effective with an average of 88% , social welfare is very effective with an average of 88% and program flow in the health component is very effective with an average of 90%, education is very effective with an average of 90% and social welfare is very effective with an average of 93%. Based on the results of the research, it can be ignored that the authority to implement the Regulation of the Minister of Social Affairs of the Republic of Indonesia number 1 of 2018 concerning the Family Hope Program in Gunung Sarik Village, Padang City has been implemented very effectively.
