ABSTRACT

This study aims to analyze the effect of return on assets and debt to equity ratio on stock prices with dividend policy as an intervening variable (in retail trading sub-sector companies listed on the Indonesia Stock Exchange 2015-2019 period). The sampling method in this study used the census method (saturated sampling), so that a sample of 27 companies was obtained. The data analysis technique used in this study was multiple linear regression with the help of SPSS software. Based on the results of this study, it can be concluded that return on assets has an effect on dividend policy, while the debt to equity ratio has no effect on dividend policy. Return on assets and debt to equity ratio do not affect stock prices, while dividend policy affects stock prices. Return on assets and debt to equity ratio have no effect on stock prices with dividend policy as an intervening variable.
