**ABSTRACT**

*This study aims to see the effect of price discount and store atmosphere on impulse buying. This study uses a data learning method with a questionnaire. The population and sample used in this study were 138 Hammer customers in the city of Padang. The data analysis method in this research is SPSS. The hypothesis in this study was tested using analytical techniques which include: validity and reliability tests. From the test results it can be ignored that the value of the price discount coefficient is 0.168 with a significance value of 0.046, which means that it has a positive and significant effect on impulsive purchases and the store atmosphere coefficient value is 0.670 with a significance value of 0.000 which means that it has a positive and significant effect on Hammer brand customers in the city of Padang.*
