ABSTRAK

Rekam medis merupakan keharusan yang penting bagi data pasien untuk diagnosis dan terapi. Permenkes No. 269 Tahun 2008 mengatur tentang Rekam Medis. Pengisian rekam medis di RSUD Solok Selatan yang dilakukan oleh dokter sering tidak lengkap di lihat dari status pasien. Permasalahan yang diangkat dalam penelitian ini adalah: (1) Bagaimana tingkat kepatuhan dokter dalam pengisian rekam medis di RSUD Solok Selatan? (2)Apa faktor yang mempengaruhi kepatuhan dokter dalam melakukan pengisian rekam medi. Penelitian ini penelitian yang bersifat *deskriptif analitif* dengan pendekatan *yuridis sociologis* yaitu pendekatan yang dilakukan melalui perundang-undangan yang ada, yang erat kaitannya dengan penelitian serta norma yang berlaku. Sumber data yang digunakan meliputi data primer yang diperoleh dari kuisioner, data sekunder didapatkan dari dari RSUD Solok Selatan. Data primer dan sekunder diolah secara deskriptif dan SPSS. Berdasarkan penelitian dapat disimpulkan bahwa: (1) Tingkat kepatuhan dokter dalam pengisian rekam medis di RSUD Solok Selatan masih rendah. (2) Ada beberapa faktor yang memengaruhi kepatuhan dokter dalam pengisian rekam medis yaitu : insentif, masa kerja dan persepsi terhadap SOP dan Form isian.

Abstract

Medical records are an important necessity for patient data for diagnosis and therapy. Regulation of the Minister of Health No. 269 on 2008 governing medical record. The medical record filling in the South Solok Hospital conducted by the doctor is often incomplete in view of the patient's status. The issues raised in this study are: (1) How is the level of doctor's compliance in medical record filling in the South Solok Hospital? 2 What are the factors affecting the doctor's compliance with medical record filling. This research was a descriptive analysis of the research with a socio-legal approach that is an approach conducted through existing legislation, which is closely related to the research and norms that apply. The data source used includes the primary data obtained from the questionnaire; secondary data is obtained from the South Solok RSUD. Primary and secondary Data were processed in a descriptive and SPSS. According to the study, it is show that: (1) the level of compliance of doctors in the medical record filling in the South Solok HOSPITAL is still low. (2) There are several factors that affect the doctor's compliance in the medical filling: incentives, employment and perception of SOP and Form stuffing.
