## **ABSTRAK**

Penelitian ini bertujuan mengenai Analisis Domain Ekonomi dan Sosial Wanita Nelayan Kawasan Pesisir di Kelurahan Pasie Nan Tigo Kecamatan Koto Tangah Kota Padang. Penelitian mengenai Analisis Domain Ekonomi dan Sosial Wanita Nelayan Kawasan Pesisir Kota Padang ini dilakukan di Kelurahan Pasie Nan Tigo, Kecamatan Koto Tangah. Yang dilaksanakan pada Bulan Maret sampai April 2019. Kontribusi wanita nelayan dalam meningkatkan pendapatan keluarga adalah 46,61%. Rata-rata pendapatan keluarga wanita nelayan adalah Rp 3.132.235 sedangkan UMR kota Padang 2019 yaitu Rp 2.280.000. Rata-rata rasio tabungan keluarga wanita nelayan yaitu positif 26,65%. Hal tersebut mengartikan bahwa dari total pendapatan keluarga berpotensi menyimpan kelebihan pendapatan sekitar 25,65% nilai ini tergolong rendah akan tetapi berpotensi hutang. Aset yang dimiliki responden berupa aset lancar, aset tetap dan aset tidak berwujud. Peran isteri nelayan di Kelurahan Pasie Nan Tigo bukan hanya terbatas pada aktivitas domestik dan ekonomi publik, mereka juga masih meluangkan waktu untuk aktif dalam kegiatan-kegiatan sosial kemasyarakatan. Lokasi penelitian dikatakan damai karena konflik tersebut jarang sekali terjadi serta segera diselesaikan sehingga tidak ada dendam antar wanita nelayan. Berkembangnya zaman, wanita nelayan memasukkan tradisi-tradisi modern pada kehidupan pribadinya sehingga berpengaruh pada kearifan lokal.

## **ABSTRACT**

*This study aims on Economic and Social Domain Analysis of Coastal Fishermen Women in Pasie Nan Tigo, Koto Tangah District, Padang City. The research about the Economic and Social Domain Analysis of the Fishermen Women's Coastal Area of Padang City was conducted in Pasie Nan Tigo, Koto Tangah District. That was carried out in March to April 2019. The contribution of women fishermen about increasing family income was 46.61%. The average family income of women fishermen is Rp 3,132,235 while the UMR of Padang city on 2019 is Rp 2,280,000. The average saving ratio of fishermen women's families is positive 26.65%. That means family income has the potential to save excess income around 25.65%, this value is classified as low but potentially debt. Assets owned by respondents in the form of current assets, fixed assets and intangible assets. The role of the fishermen's wife in the Village of Pasie Nan Tigo is not only limited to domestic activities and the public economy, they also take time to be active in social community activities. The location of the study was said to be peaceful because the conflict rarely occurred and was immediately resolved so there was not resentment between the fishermen women. The development of the times, fishermen women incorporate modern traditions in their personal lives so that it influences local wisdom*
