

ABSTRACT

This study aims to prove the effect of profitability, company size, and company growth on the company's stock price in the infrastructure, utilities and transportation sectors on the Indonesia Stock Exchange. In this study all infrastructure, utilities and transportation sector companies in the Indonesia Stock Exchange were selected using a sampling method using a census. In this study four variables are used, namely stock price, profitability of company size and company growth. The data is used from 2015 to 2018. Data analysis methods are used to prove the truth of the multiple regression analysis hypothesis. In accordance with the results of the first hypothesis testing (H1), it was found that profitability had a positive effect on the stock prices of the Infrastructure, Utilities and Transportation companies listed on the Indonesia Stock Exchange. The second hypothesis (H 2 2) was found that company size had a positive effect on the stock prices of the Infrastructure, Utilities and Transportation companies listed on the Indonesia Stock Exchange while the third hypothesis (H3) found that company growth had no effect on the stock prices of the Infrastructure sector companies, Utilities, and transportation that are listed on the Indonesia Stock Exchange.

ABSTRAK
