The type of this research was correlational study. This research was aimed to find out the correlation between students’ motivation to learn English and students’ vocabulary mastery toward their ability in listening to long talk of the third year students at English Department of Bung Hatta University. The number of population members was 23 students. The researcher used total sampling technique. The researcher gathered the data by using three instruments, namely questionnaire to collect data on students’ motivation, vocabulary test to know the students’ vocabulary mastery, and listening test to know students’ ability in listening to long talk.

Having analyzing the data, the researcher found that the value of coefficient correlation between students’ motivation to learn English and their ability in listening to long talk was 0.95, and $r_{table} = 0.4132$ ($\alpha = 0.05$ and $df = n - 2$ (21)). The coefficient correlation between students’ vocabulary mastery and their ability in listening to long talk was 0.85, and $r_{table} = 0.4132$ ($\alpha = 0.05$ and $df = n - 2$ (21)). The coefficient correlation between students’ motivation to learn English and students’ vocabulary mastery was 0.86, and $r_{table} = 0.4132$ ($\alpha = 0.05$ and $df = n - 2$ (21)). The coefficient correlation between students’ motivation to learn English and students’ vocabulary mastery toward their ability in listening to long talk was 0.95 with $F_{h} = 92.56$ and $F_{table} = 3.49$ ($\alpha = 0.05$ and $df = n - k - 1$ (20)). After testing hypothesis, alternative hypothesis was accepted that stated that there was significant correlation between students’ motivation to learn English, students’ vocabulary mastery, and their listening ability in long talk.

Related to the findings, the researcher proposed suggestions that lecturers should give the students motivation to learn English, give more variant exercises on vocabulary with interesting listening English activities in the classroom.

In addition, the researcher suggests the students to improve their motivation and to be more aware of the importance of motivation in learning English as a Foreign Language, and also do more exercises and practice on vocabulary and listening. Furthermore, the other researchers are suggested to find other factors that correlate with the ability in listening to long talk.
