Abstract

This study aims to prove and analyze the effect of corporate social responsibility, institutional ownership, managerial ownership and public ownership on the readability of the financial statements of manufacturing companies on the Indonesia Stock Exchange. In this study, purposive sampling method was used to obtain the appropriate data. The data analysis method used to answer the truth of the hypothesis is multiple regression and t-statistical testing. The data processing is done by using the help of Eviews 9.0. Based on the results of hypothesis testing, it was found that corporate social responsibility had a negative and significant effect on the readability of the annual report. In the hypothesis testing stage, it was found that managerial ownership had a positive effect on the readability of financial statements, while institutional ownership and public ownership had no significant effect on the readability of the annual reports of manufacturing companies on the Indonesia Stock Exchange.
